

PROTECT YOUR RIT® QA SOFTWARE INVESTMENT PRODUCT MAINTENANCE PROGRAM (PMP)

Medical Physics is a rapidly-changing field, and RIT is dedicated to developing leading edge QA software solutions. Members of RIT's Product Maintenance Program (PMP) stay ahead of emerging imaging and treatment QA methods, as well as new regulatory requirements. **Have peace of mind knowing your trusted choice in QA software actively stays current!**

BENEFITS OF PMP SUPPORT

RIT'S LATEST AND GREATEST AT YOUR FINGERTIPS

Get exclusive access to software updates, new features, and product enhancements. Conveniently download RIT software upgrades online, at any time. Ensure that you utilize the latest innovations to achieve the most precise measurements and maximize efficiency in your QA workflow.

ENHANCED CYBERSECURITY WITH EVERY UPDATE

With each software upgrade comes increased cybersecurity capabilities. RIT carefully follows the ISO 13485 guidelines, FDA guidelines, and the NIST Framework for cybersecurity of medical devices and stays proactive in enhancing our software protection for any new and emerging threats. We continually invest in our cybersecurity capabilities and hope that RIT customers will do the same to ensure they stay ahead and mitigate any cybersecurity risks.

ADVANCED PHYSICS AND TECHNICAL SUPPORT

Receive unlimited phone, email, and remote support from RIT's team of dedicated technical software experts and medical physicists. RIT Technical Support is here for you: We can diagnose and offer solutions to any potential problem and provide assistance with downloading and/or installing new products and software upgrades.

VIRTUAL SOFTWARE TRAINING CLASSES

Conveniently learn basic and advanced quality assurance techniques on-demand, in the comfort of your own office or home. RIT's virtual classroom training sessions will train you in the basic and advanced knowledge of quality assurance techniques using the RIT Family of Products software. View the on-demand videos at any time on our website for educational purposes, or earn MPCEC hours during our scheduled live sessions, offered periodically.

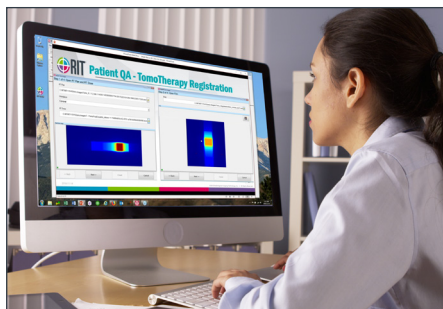

BENEFITS OF PMP SUPPORT

(CONTINUED)

ONE-ON-ONE TRAINING

Request unlimited, personal RIT software training to fit your schedule. Invite colleagues from your department or satellite facilities to join the session, hosted by a Medical Physicist.

IN-DEPTH WEBINARS

Register for RIT's free educational webinars to learn about specific products and features. RIT's webinars are led by a product expert and offered at two convenient timelocations.

VIDEO TRAINING LIBRARY

Gain exclusive access to RIT's extensive online video training library. Watch in-depth online video tutorials on specific RIT software features and routines on-demand: anytime, anywhere.

CONVENIENT ACCOUNT AND LICENSE MANAGEMENT

Customize your online profile and view available RIT software upgrades in one, easy-to-use interface. Easily check your PMP status and the expiration date on every previously-purchased RIT software product.

Conveniently choose from three licensing models to best fit your facility's needs. These include floating (internet-based) licenses, a local license server (intranet-based), or node-locked (machine-tied) licenses. RIT software licenses are valid for the useful life of the RIT product, as defined by RIT. The useful life of the product is currently 5 years, due to operating system, licensing, and cybersecurity upgrades. RIT is particularly vigilant about staying ahead of potential cybersecurity risks with each software upgrade.

EASILY RENEW YOUR PMP SUBSCRIPTION

Your continued investment in RIT software is one of the smartest choices you can make, so we highly-recommend keeping all of your products in-support with RIT's Product Maintenance Program. Renewing your PMP subscription is easy! RIT prides itself on offering exceptional support, so we will notify you when a products' renewal date is approaching. You may also contact us anytime to discuss your PMP renewal, and we would be happy assist you.
